FUNCTION: La protein plays a role in the transcription of RNA polymerase III. It is most probably a transcription termination factor. Binds to the 3' termini of virtually all nascent polymerase III transcripts. It is associated with precursor forms of RNA polymerase III transcripts including tRNA and 4.5S, 5S, 7s, and 7-2 RNAs.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Immunol. 150:3091-3100(1993).

PTM: PHOSPHORYLATED. THE PHOSPHORYLATION SITES ARE AT THE C-TERMINAL PART OF THE PROTEIN.

PTM: The N-terminus is blocked.

DISEASE: Sera from patients with systemic lupus erythemato often contain antibodies that react with the normal cellul La protein as if this antigen was foreign.

SIMILARITY: Contains 1 RNA recognition motif (RRM) domain.

It is most probably a transcription terminat factor. Binds to the 3' termini of virtually all nascent polymerase III transcripts. It is associated with precursor
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              polymerase III transcripts. It is associated of RNA polymerase III transcripts including

C; Comment: This protein associates with a variety of small RNA molecules,
ay act as a transcription termination factor.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           A;Molecule type: mRNA

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              FUNCTION: La protein plays a role in the transcription of RNA polymerase III. It is most probably a transcription termination factor. Binds to the 3' termini of virtually all nascent polymerase III transcripts. It is associated with precursor forms of RNA polymerase III transcripts including tRNA and 4.55, 55, 78,

Gene 126:265-268(1993).
-!- FUNCTION: La protein plays a role in the transcription of RNA polymerase III. It is most probably a transcription termination factor. Binds to the 3' termini of virtually all nascent polymerase III transcripts It is associated with precursor forms of RNA polymerase III transcripts including tRNA and 4.58, 58, 78,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      SEQUENCE

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             15-MAR-2004
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Immunol. 150:3091-3100(1993).
                                                                                                                                      and 7-2 RNAs.
SUBUNIT: Interacts with DDX15 (By similarity).
SUBCELLULAR LOCATION: Nuclear (Probable).
PTM: Phosphorylated (By similarity).
SIMILARITY: Contains 1 RNA recognition motif (
                                                                                                                                                                                                                                                                                                                                                                          FUNCTION: La protein plays a role in the transcription of RNA polymerase III. It is most probably a transcription termination factor. Binds to the 3' termini of virtually all nascent polymerase III transcripts. It is associated with precursor form of RNA polymerase III transcripts including tRNA and 4.58, 58, 7
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          AALEAKICHQIEYYFGDF
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         AALEAKICHQIEYYFGDF 28

J. Mol. Biol. 231:196-204(1993).

J. Mol. Biol. 231:196-204(1993).

-:- FUNCTION: La protein plays a role in the transcription of RNA
polymerase III. It is most probably a transcription termination
factor. Binds to the 3' termini of virtually all nascent
polymerase III transcripts (By similarity).

-:- SUBCELULAR LOCATION: Nuclear (Probable).

-:- DEVELOPMENTAL STAGE: Barely detectable in stage I/I occytes,
accumulate in stage III/IV occytes, then exhibit a roughly
constant steady state level in mature occytes, eggs, and early
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              XENLA

                                                                                                                                                                                                                                                                              "La proteins from Xenopus laevis. CDNA cloning and developmental expression.";
J. Mol. Biol. 231:196-204(1993).
i. FUNCTION: La protein plays a role in the transcription of RNA polymerase III. It is most probably a transcription termination factor. Binds to the 3' termini of virtually all nascent polymerase III transcripts (By similarity).
polymerase III transcripts (By similarity).
i. SUBCELLULAR LOCATION: Nuclear (Probable).
i. SUBCELLULAR STAGE: Barely detectable in stage I/II occytes, accumulate in stage III/IV occytes, then exhibit a roughly
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           LAA_XENLA

PTM: Phosphorylated (Probable).

PTM: Phosphorylated (Probable).

MISCELLANEOUS: There are two forms of La, LaA and LaB, in:

SIMILARITY: HIGH, TO MAMMALIAN LA PROTEIN.

SIMILARITY: Contains 1 RNA recognition motif (RRM) domain.
                                                                                                                                                                                                                                                              constant

-I- FUNCTION: Allows the formation of correctly charged Asn-tRNA(Asn) or Gln-tRNA(Gln) through the transamidation of misacylated Asp-tRNA(Asn) or Glu-tRNA(Gln) in organisms which lack either or both of asparaginyl-tRNA or glutaminyl-tRNA synthetases. The reaction takes place in the presence of glutamine and ATP through an activated phospho-Asp-tRNA(Asn) or phospho-Glu-tRNA(Gln) (By
